GitHub ✦ Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer skilled in Python, Django, Django REST Framework (DRF), JavaScript, REST API development, JWT authentication, and PostgreSQL/MySQL database design. Building AI-integrated SaaS, e-commerce, and knowledge management platforms with scalable, reusable backend architecture. Seeking a Full Stack / Backend Developer internship.

TECHNICAL SKILLS

Languages & Frameworks: Python, Django, Django REST Framework (DRF), JavaScript, HTML5, CSS3
Databases: PostgreSQL, MySQL, SQLite, Database Design & Optimization
Backend & APIs: REST API Development, JWT / Token-Based Authentication, API Integration, Full Stack Development
Tools & Practices: Git, GitHub, Version Control, Object-Oriented Programming (OOP), Responsive Design, Problem Solving
Currently Learning: Docker, CI/CD basics, Unit Testing (Django TestCase / pytest), Agile fundamentals

PROJECTS

HireGenie — AI Career Copilot

GitHub | Live Demo

Python • Django • AI API • Render

- Built an AI career copilot for ReverieHacks 2026 (submitted on Devpost) with resume-to-job-description match scoring.
- Developed a cold email generator and AI-powered interview preparation features.
- Created an application tracker dashboard with secure login/register authentication and protected user pages.
- Deployed the full application live on Render with the complete codebase maintained on GitHub.

Bharosa AI — AI Trust & Compliance Platform

Python • Django • LLM API

- Building a unified AI trust platform combining an LLM gateway with PII masking and an AI red-team testing tool.
- Developing DPDP compliance reports to help organisations check their data-protection readiness.
- Creating "Kagaz Samjhao", a Hindi document explainer that simplifies complex documents using LLMs.
- Focused on a full Django backend, clean architecture, and a polished, user-friendly frontend.

EDUCATION

Bachelor of Computer Applications (BCA)

Chaudhary Charan Singh University (CCSU) — Expected Graduation: 2028
